**Minchul Park**

**PREFACE**

SuJok & Triorigin Science founded by Professor Park Jae Woo is a noble gift to mankind. With a history of no more than 40 years, it has spread and has been accepted quite well in the society due to its logical understanding, scientific background, easy availability and affordability for one and all.

It is a system of knowledge comprising a wide range of therapeutic methods. It is noteworthy to say that Sujok is able to help more than 10 million people everyday all over the world. The method is vastly taught and explored in the medical centers of many countries.

Professor Park Jae Woo started His journey with the correspondence systems of the human body and the Creator drove Him until He found out Triorigin Theory, a universal philosophy reflecting the entire universe. His life was a message for the mankind, His journey was a lighthouse for many who were searching the right path. He touched many lives just to bring them to the ultimate reality. He left us in 2010 with a huge knowledge and a great responsibility towards a Smiling World.

***Quaderno n. 14 di «AGON» (ISSN 2384-9045)  
Supplemento al n. 23 (ottobre-dicembre 2019)***

I am lucky enough to be one of His disciples, who has realised that the assigned duty is not a usual task but a very important work of spreading the will of the Great Master. It is a moment of proudness for me as the eldest son of Professor Park that the journal AGON is publishing a special issue in His memory. This magazine includes some articles from Sujok and Triorigin scholars, life stories on Professor's life and glimpse of Sujok Science. I am sure that this will enlighten many to adopt Sujok and Triorigin as a part of their life style.

I thank and wish the greatest success to the publisher and the entire editorial team for taking this noble step.
